Select [Large Screen] to view your source selection on the projection screen

Turn on the data projector:

- 1) When you have selected your media source, press the [Large Screen] button. The projector will begin to warm up, which will take about 60 seconds.

Adjust Volume:

- 1) Program volume will control **ALL** our source materials.
- 2) The two mic volume controls work independently of each other for the wireless lapel and the podium top microphone.

Laptop:

- 1) Connect either the VGA cable or the HDMI cable
- 2) Select the [Computer] then [Laptop] for the VGA cable or the [Aux] then [Podium Aux HDMI] for the HDMI cable
- 3) Select [Large Screen]

Document Camera:

- 1) Select [Computer] then [Laptop]
- 2) Insert VGA cable into the **BLUE** RGB OUTPUT on the side on the document camera
- 3) Use the controls on the camera to zoom in/out and focus on your presentation material
- 4) Select [Large Screen]

Blu-Ray/DVD:

- 1) Select [Video] then either [Podium DVD/VHS] or [Booth Blu-ray] as desired
- 2) Use the controls to navigate the media as needed
- 3) Select [Large Screen]

Lecture Capture:

- 1) This room is equipped to support Panopto Lecture Capture System. For more information please visit <http://www.washington.edu/itconnect/learn/tools/panopto/faqs/> To schedule automated recordings visit <http://www.washington.edu/itconnect/learn/tools/coursecasting/>

Wireless Microphone:

- 1) The wireless microphone is located in the drawer of the podium. You will need an IOFA key to access this. The power button is located on the **TOP** of the transmitter pack. A **GREEN** LED will indicate the mic is on.
